STATEMENT

FOR S.A. POLICE

To Point 3 of Form SAP 271 E
Application for firearm licence
Herstal Semi-automatic Pistol, 9mm short barrel

As can be seen from the attached licence application, I already possess an automatic Walther PPK pistol, calibre 7,65 mm. Although this hand weapon offers very good protection for me and my family at home, things become somewhat difficult when I have to travel to power stations in the Eastern Transvaal or to various sugar estates and refineries all over the country. On those occasions I take the Walther pistol with me, which means that my wife and two daughters are left with no proper protection at home in Randburg. I would therefore appreciate it if the licence could be granted to me to purchase the above indicated weapon as well, which I could then take with me on my various journeys by car.

I ought to mention that I very often carry highly confidential and classified documentation with me, since we have a very intensive cooperation with the nuclear industry as well as the armaments industry in this country. During a breakdown of the car, a puncture repair or the like, this weapon would offer me the proper protection that I would desire for my travelling activities.
